My goal with **Wellbeing Attitude** is to spread a **simple and "down to earth" holistic well-being**, through energy rebalancing treatments and creating small gestures with the person from time to time that can become wellness rituals that everyone can draw on. We can say a holistic version of "Grandma's Remedies"!

*I love joy and laughs:
you can elevate your energy
just chilling and dancing
or letting me take care of you...*

*I've got a profound respect
when a person relies on me,
it's a sacred moment for the soul*

To be open and to honor all my training, I'm collecting here my Holistic Certificates, my title has been translated and certified, all other titles are in Italian with translation.

The training body has been enrolled with SC code 132/12 on the national S.I.A.F list of Training Bodies for the quality of training provided, valid for the insertion of its own students in the Professional Holistic Therapists Trade Register.

In Italy, I can't have the title of “therapist” (only medical professional can have it); due to the amount of hours and training achieved in the three years of study at the Holistic Academy, I have been given the title of “Holistic Therapist” from a UK services.

To make it easy and better understandable, I have opted for a more generic “Holistic Practitioner” or “Holistic Coach” on my documents.
